TO WHOM IT MAY CONCERN

Mariplex Mall, Kalyani Nagar Pune is a Manisha Construction Property and in keeping with the groups focus believes in maintaining a premium, environmentally conscious and efficient facility. As a Green Initiative, it was decided to take trials of AEROPURE UV SYSTEMS PVT. LTD. energy saving equipment for HVAC called "WATMIZER".

In September 2011, "WATMIZER" system was installed in all AHUs of the Mall with a total tonnage of 145TR covering about _____ sq-m.

Seven months comparison Year-On-Year (2009-10, 2010-11 and 2011-12) of chiller consumption showed significant reduction in electrical power consumption of HVAC bill. A reduction of around 10% of units consumed was observed and achieved over 7 months after installation of "WATMIZER" while taking into account seasonal temperature variation, maintenance cycle and other variables.

The credit for successful completion of this initiative must be given to the close co-operation between engineering teams of Mariplex and Aeropure.

The management of Mariplex is pleased with the results of the "WATMIZER" system and recommends the same for energy conversation in HVAC.
