TO WHOM IT MAY CONCERN

As a Green Initiative, The Westin Pune has decided to take trials of AEROPURE UV SYSTEMS PVT. LTD. energy saving equipment for HVAC called "WATMIZER".

In September 2012, "WATMIZER" system was installed in Laundry AHU of the Hotel with a total tonnage of 16TR on Trial basis.

Two months comparison of airflow (cfm) has shown significant increase in the airflow of the AHU keeping all the other parameters same.

 The credit for successful completion of this initiative must be given to the close co-operation between engineering team of The Westin Hotel and Aeropure.

This letter is issued solely on the request of Aeropure UV Systems pvt. Ltd.

Jayant Kadam

Director of Engineering
The Westin Pune Koregaon Park
